

Built with luxury and exhilaration in mind, The Sepang International Circuit has been given the rare honor of incorporating the F1 logo in its name. The circuit boasts 15 turns and 8 straights, allowing speeds of up to 190 miles/hour. There are a few parts of the track that are very wide, which allows thrilling overtaking. The best part of this track is its ability to be split, allowing two races to run concurrently. Extreme tropical conditions promise compelling challenges that entertain up to 130,000 spectators at a time.
