During the nation's infancy, the Communist Party of Malaya used Tempurung Cave as a hideout and as a base of operations to strike against the local defense force. Now, visitors can still view the battle plans drawn on the walls and ceilings of the cave. Some of the passages lead right through the complex to a beautiful and scenic view of the Perak Jungle.

Getting there: *Get a bus to Gopeng, 15.53 miles South of Ipoh and then a taxi.*
