

The mosque sits on stilts on an open sandy area with water flowing underneath. Hence, it was nicknamed ‘The Floating Mosque.' Reputed to be the only one of its kind in the country, this beautiful masterpiece cleverly blends Moorish and Islamic architecture. It is equally breathtaking at night, when the lighting helps create an illusion that the mosque is floating on water.

Getting there*: Located just outside Kuala Terengganu, local buses and taxis are easily available from the town center.*
